

Replacement Filter Elements

Features:

Particulate Element

- Solid Particulates
- Liquid Oil Rust and Pipe Scale

Coalescing Element

- Oil and Water Aerosols
- Particulates to 0.01 Micron

Applications:

- Desiccant Air Dryers
- Membrane Air Dryers
- Pneumatic Hand Tools
- Pneumatic Instrumentation
- Air Gauging

Twin Tower Engineering knows how vital it is to protect air system components from water and oil aerosols, liquid oil, scale, and dirt. These contaminants can cause malfunction or loss of air dryer efficiency. It is very important to follow the manufacturer's suggested maintenance for your compressed air dryer filtration by changing the elements in the filter kit.

Each element replacement kit includes all three filter elements and filter bowl o-ring for the complete maintenance of your optional air dryer filter package

Particulate Prefilter
(5.0 micron)

Coalescing Prefilter
(.01 micron)

Particulate Afterfilter
(0.5 micron)
